

Brilliant Silver Rose

Brilliant Silver Rose will not dry your hair and is easily removed with just a few shampoos.

Brilliant Silver Rose is a non-metallic product that can be used on all hair types.

Brilliant Silver Rose can be used effectively to reduce yellow, brassy, red tones and add shine to all hair colours.

You will get a **Brilliant** result with one application.

Brilliant Silver Rose can be mixed with **Brilliant Silver White**, giving your hair a very soft strawberry blonde colour. The more drops added to water the darker the colour.

For a special night or just to be a little different you can streak your hair with Brilliant Silver Rose for a really funky look.

Simply add Brilliant Silver Rose direct from the bottle on a few strands of hair. Leave in until hair changes colour, then run your protected fingers down your hair to get rid of the last few drops of the solution, rinse and allow to air dry.

For a Strawberry Blonde Colour

- 1) Start with 1lt of warm water, to that add 5 drops of Brilliant Silver Rose, stir to mix in solution.
- 2) With a container pour over your hair until evenly covered, wait until completely dried to see the results.

If you prefer a darker colour add more drops to your water then repeat step 2 again

Safety Directions:

This product is for external use only. Not to be taken. Avoid eye contact. Brilliant Silver White will stain skin and clothing.

Wear rubber gloves while using Brilliant Silver White or Brilliant Silver Rose.

If irritation occurs, discontinue use immediately.

First Aid:

If eye contact occurs, rinse under running water for 15 minutes and see a doctor if necessary. If swallowed, induce vomiting and seek medical advice.

brilliant Silver White

Temporary Highlighter • Toner

Information
and
Instruction
Brochure

Before you begin:

Read this brochure thoroughly and keep for reference. **Brilliant Silver White** will not damage stainless steel sinks or utensils however, it is recommended that you protect all bathroom surfaces.

Brilliant Silver White may stain porous surfaces such as enamel, vinyl, laminate, wood, slate, or marble.

Equipment:

Before you start, you will need a few things.

- 1) Sink or Basin.
- 2) Plastic/Glass container or jug.
- 3) Rubber gloves.
- 4) Dark towel to prevent staining of skin or clothing.

Colour Test:

- 1) Dilute Brilliant Silver White as per instructions.
- 2) Test on a small amount of your hair.
- 3) Dry hair sample and examine results.
- 4) if needed, adjust dose and try again.

Preparation and Application:

- 1) Wash and Condition hair. Then towel dry.
- 2) Protect shoulders and hands with towel and gloves.
- 3) Add required number of drops to 1 liter of water.
- 4) Pour the prepared mixture evenly over hair.
- 5) Towel dry and style as usual.

Tips:

We recommend that hair be clean and well conditioned prior to application.

A colour test on a few strands of hair is recommended to ensure an ideal result (see colour test for details).

As with all Toners and Highlighters, if used on dry or damaged hair the final result may be too vibrant.

In areas of highly chlorinated water supply, we recommend the use of bottled or distilled water.

About Brilliant Silver White:

Brilliant Silver White is a very effective Toner and Highlighter. Being a water based product, it will not damage or dry your hair and is easily removed with just a few shampoos.

Brilliant Silver White is a non-metallic product that can be used on all hair types.

Brilliant Silver White can be used effectively to reduce yellow, brassy, red tones and add shine to all hair colours.

You will get a **Brilliant** result with just one application.

Brilliant Silver White highlights bleached and blonde hair while removing yellow and brassy tones. As shown above and below.

Brilliant Silver White: How Much Do I Use?

The amount of **Brilliant Silver White** you need to use will depend on your hair's starting colour, and the result you are after. The following table is an indication only, and we recommend that you start off with a smaller dose than is shown. After application dry hair completely to see the true colour. If a stronger effect is required, add more drops to your 1lt of water, and repeat **step 4** until you are happy with the result.

Starting Colour	Recommended Dose (with 1 litre warm water)	Results
Blonde/Tinted/Streaked Hair	5-15 drops	Reduces yellow/brassy tones for a cooler blonde
Natural Blonde Hair	5-20 drops	Cool to platinum blonde tones
Grey Hair	10-25 drops	Reduces yellow and brightens natural grey colours
Permanently Coloured Hair	10-20 drops	Reduces red/brassy tones
Natural Light to Med Brown Hair	20-30 drops	Reduces red tones and adds shine
